The 2023 Functional Literacy, Education, and Mass Media Survey (FLEMMS) is a national survey that assesses the population's literacy, educational qualifications, and exposure to mass media. The 2023 FLEMMS survey aims to provide a quantitative framework for improving literacy and education status in the population. It aims to estimate the proportion of the population aged 10 and above who are basically literate, and those aged 10 to 64 who are functionally literate. It also assessed the educational and skills qualifications of the population and the mass media exposure of the basically and functionally literate/illiterate population.

The 2023 FLEMMS enumeration period will commence from 30 September 2024 to 22 October 2024. The PSA IX enjoins all sample-households to cooperate and provide complete and truthful information for the success of the survey and to generate accurate data.
